

NAME

`kpseradlink` – print contents of symbolic link

SYNOPSIS

`kpseradlink` *file*

DESCRIPTION

If *file* is a symbolic link, print its contents (what it links to), and exit successfully. Exit with a failure otherwise.

On systems that do not support symbolic links, `kpseradlink` will always fail.

OPTIONS

`kpseradlink` accepts the following options:

--help Print help message and exit.

--version

Print version information and exit.
